Bush Boomerang, Inc., is considering a new three-year expansion project that requires an initial fixed asset investment of $2.1 million and an initial investment in net working capital of $275,000. The fixed asset will be depreciated straight-line to zero over its three-year tax life, after which time it is estimated to have a market value of $325,000. The project is estimated to generate $1,900,000 in annual sales, with costs of $850,000. If the tax rate is 35 percent, what is the NPV for this project assuming the required return on the project is 15 percent?
